## **DETAILED ACTION**

#### Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on November 15, 2006 has been entered.

## Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

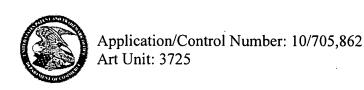

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 9, 2, 3 and 22 are rejected under 35 U.S.C. 102(b) as being anticipated by Heurteboust (EP Patent # 614711 A1). Heurteboust discloses a press machine (10) having a cushion pin (15) interposed between a work (1) and a die cushion (11), comprising a pillar member (12b) and an elastic material (spring 16) that is arranged coaxially with respect to the pillar member (12b) and produces a pushing force in an axial direction of the pillar member (12b).

### Allowable Subject Matter

The following is a statement of reasons for the indication of allowable subject matter.

1. It is the opinion of the examiner that the art of record (considered as a whole) neither anticipates nor renders obvious a cushion pin having a pillar member comprising of "a bolt

member attached to a first member; a sliding member disposed between a head of the bolt member and an end face of the first member; and a second member attached to an opposite end of the sliding member relative to the first member, wherein the first member, the bolt member, the sliding member and the second member are coaxially aligned, and wherein the elastic member is disposed around said bolt member and in said sliding member" in combination with the rest of the claimed limitations set forth in claims 10, 16 and 19. Therefore, it is concluded that claims 10 and 16-21 of the present invention are allowable subject matter over the prior art. Further explanation can be found in the Office Action dated August 15, 2006.

4. Claims 10-12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

### Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Debra Wolfe whose telephone number is (571) 272-1904. The examiner can normally be reached Monday - Thursday 7am - 4:30pm with alternating Friday 7am - 3:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Lowell Larson can be reached at (571) 272-4519. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
